

Corporate Presentation

2024

V 3.6

Corporate Overview

Year of Incorporation

- 2011

Engagement

- Fixed Price
- Managed Services
- Professional Services

Footprint

- India
- USA
- Singapore
- Canada

Portfolio

- Technology Services
- Software Solutions

Verticals

- Banking
- Insurance
- Capital Markets
- Financial Services

Digital Transformation Services

- Digital Application Development
- Microservices Development & Containerization
- Service-oriented Architecture & API
- BPM & Robotic Process Automation
- Business Rules Management

Business Insights

- Reporting & Dashboards
- Data Marts & Data Lakes
- Operational Data Stores
- Extract, Transform, Load (ETL)
- Visualization

DevOps

- User Stories
- Source Code Management
- Code Review & Coverage
- Build & Deployment
- Configuration Management
- Infrastructure as Code

Cloud Services

- Cloud Migration
- Cloud Foundry
- Private Cloud
- Cloud Infrastructure Management

Middleware Services

- Monitoring
- Incident Management
- Problem Management
- Installation & Configuration
- Performance Tuning
- Architecture Consulting
- Security Implementation
- Upgrades & Migration

Digital Transformation Services

- **Digital Application Development**
 - AngularJS
 - Native/Hybrid Android & iOS
 - HTML5, jQuery
 - Java/J2EE
 - Microsoft .Net
- **Microservices Development & Containerization**
 - Node JS, Spring Boot
- **Service-oriented Architecture & API**
 - IBM IIB
 - Oracle SOA Suite
 - Mule ESB
 - API Connect
- **BPM & Robotic Process Automation**
 - IBM BPM
 - Automation Anywhere
- **Business Rules Management**
 - IBM ODM
 - JBoss Drools

Business Insights

- **OBIEE**
- **IBM Cognos**
- **MSBI**
- **Tableau**
- **QlikView**
- **DataStage**
- **Informatica**
- **Jasper ETL**

Middleware Services

- **IBM**
 - WebSphere Application Server, IBM MQ, IIB, IBM BPM, API Connect, FileNet
- **Oracle**
 - Oracle WebLogic Enterprise, OBIEE, Oracle WebCenter Content
- **Red Hat**
 - RHEL, JBoss

DevOps

- **Git / AWS CodeCommit / Atlassian Bitbucket**
- **JIRA**
- **Jenkins**
- **SonarQube**
- **Selenium with TestNG**
- **Ansible**
- **Chef**
- **Docker Compose**
- **Kubernetes**
- **AWS ECS**

Cloud Services

- **AWS**
- **Microsoft Azure**
- **IBM Bluemix**
- **Pivotal Cloud Foundry**

Key Banking Projects

- **DevOps Implementation** - End-to-End CI/CD implementation, code quality checks, artefact repository and automated deployments. These implementations can be done on-premises as well as on cloud
- **BPM Implementation** - Implementation of workflow and process automation solutions in various functions like treasury, cash management, payments, customer service and foreign exchange
- **BI Implementation** - Implementation of BI solutions that provide detailed drill-down reports for on-ground teams and concise interactive dashboards for the top management
- **API Banking Implementation** - Implementation of scalable and secure callable interfaces to core systems. Disparate services are assembled in a single catalog and exposed in a secure and scalable way
- **SOA Implementation** - Implementation of comprehensive SOA from a simple ESB-based service gateway to a complex event-driven or change-log driven integration
- **Portal Implementation** - Implementation of internet-based portals for various communities. Provides unified view of the business that customers or partners have with the bank.
- **Platform Support** - 24x7 support for platform software from product vendors such as IBM, RedHat and Oracle. Troubleshooting, Log Analysis, Heap and Core dump Analysis, Root Cause Analysis, PMR support
- **Remittance Hub** - Highly scalable platform for processing bulk & online remittance transactions received from Exchange Houses across the globe
- **Integrated Payment Hub** - Centralized payment processing solution supporting all electronic payment systems such as RTGS, NEFT, NACH, IMPS, SWIFT etc.
- **New Account Opening** - Process automation for new account opening including processes like initiation, data entry, document verification, de-duplication, CBS integration etc.
- **Loan Origination System** - Asset-based lending solution that automates the lending life cycle from 'customer acquisition' to 'disbursement'
- **Risk Monitoring** - Enterprise-wide business risk monitoring dashboard for key risk metrics. Available for various types of treasury operations.

Key Insurance Projects

- **New Business Workflow** - Process automation for new account opening including processes like initiation, data entry, document verification, de-duplication etc.
- **Claims Workflow** - Automated process for managing & tracking claims right from claim intimation to adjudication / processing, approval and finally to settlement / payout
- **Sales Progression** - System that provides front line sales managers a structured and clear career path using online goal sheets
- **Risk Monitoring** - Enterprise-wide business risk assessment dashboard for key risk metrics. Captures risks across business functions, geographies, channels, time-periods & products
- **Benefit Illustration** - Tool to generate benefit illustrations for end customers prior to buying an insurance policy
- **Operational Data Store** - Centralized enterprise data store for all upstream and downstream data integrations
- **Signature Cropping** - A solution that enables verifying and mapping customer signature on a policy servicing request with the signature on the application form
- **Lead Management** - System covering the entire life cycle of a lead concluding in either conversion, dropped or lost statuses
- **API Implementation** - Implementation of scalable and secure callable interfaces to core systems. Disparate services are assembled in a single catalog
- **BPM Implementation** - Implementation of workflow and process automation solutions in various functions like new business, payments and customer service
- **Portal Implementation** - Solution that caters to Customers, Advisors, Employees and third-party distributors providing access to oversee transactions to mitigate risk
- **ESB & SOA Implementation** - Implementation of SOA from a simple ESB-based service gateway to a complex event-driven or change-log driven integration
- **Form Data Capture** - Configurable Data Entry forms for various products with split screen & zoning facilities

Key Pharma & Healthcare Projects

- **Data Integration using Change Data Capture** - An established and structured approach to data integration that makes change data available to systems and applications in real-time.
- **De-duplication Engine** – Streamlined solution to ensure centralized deduplication of doctor's database, resulting in accurate information for any given record.
- **Clinical Trials Packaging Traceability Solution** - A web-based solution designed to track real time statuses of clinical trial kits tracking right from manufacturing to distribution and shipping.
- **Development and Infrastructure Support** – Enhancements, installation and support for the client's track and trace solution
- **Research Project Management System Implementation** - An easy-to-deploy, reliable, solution that allows tracking project status, includes features like budgeting, project plan, task allocation, Gantt Chart, auto escalations, reminders, etc.
- **Modernization of Medical and Practice Management System** - Revamped the client's Medical Billing and Practice software, which assists doctors in managing a successful medical practice
